Emilcotoni

EMILCOTTONI GREEN CHOICE

Our certifications concerning environment, health and supply chain control.

GRS by ICEA

The Global Recycled Standard is a holistic certification for products with recycled content. The desired effect of the GRS is to provide brands with a tool for more accurate labeling, to encourage innovation in the use of reclaimed materials, to establish more transparency in the supply chain, and to provide better information to consumers.

STeP by OEKO-TEX®

STeP by OEKO-TEX® is a modular certification system for production facilities in the textile and leather industry.

The goal of STeP is to implement environmentally friendly production processes in the long term, to improve health and safety and to promote socially responsible working conditions at production sites.

GOTS by ICEA

The Global Organic Textile Standard is recognised as the most important standard for sustainable production, from the harvesting up to labelling, of garments and textile products made of natural fibres from organic farming such as organic cotton or organic wool.

STANDARD 100 by OEKO-TEX®

The STANDARD 100 by OEKO-TEX® certification is the worldwide best-known voluntary "ecological-label" for textile products and accessories. The label guarantees that textile products and their accessories do not release harmful substances to human health and are therefore safe products from the human-ecological point of view.

BCI™

The Better Cotton Initiative, a global non-profit organization, is the largest cotton sustainability program in the world. BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in, and better for the sector's future.
