Emilcotoni

A carbon footprint is the total greenhouse gas emissions caused by an individual, event, organization, service, or product, expressed as carbon dioxide equivalent.

Emilcotoni has been working for some time to gain sustainability standards that are just as high as the quality of its yarns.

SteP By OEKO-TEX®

STeP By OEKO-TEX® is a modular certification system for production facilities in the textile and leather industry. The goal of STeP is to implement environmentally friendly production process in the long term, to improve health and safety and to promote socially responsible working conditions at production sites.

Standard 100 by OEKO-TEX®

The STANDARD 100 by OEKO-TEX® certification is the worldwide best-known voluntary "ecological-label" for textile products and accessories. The label guarantees that textile products and their accessories do not release harmful substances to human health and are therefore safe products from the human-ecological point of view.

BCI™

The Better Cotton Initiative, a global no-profit organization, is the largest cotton sustainability program in the world. BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in, and better for the sector's future.

GOTS by ICEA

The Global Organic Textile Standard is recognised as the most important standard for sustainable production, from the harvesting up to labelling, of garments and textile products made of natural fibres from organic farming such as organic cotton or organic wool.

GRS by ICEA

The Global Recycled Standard is a holistic certification for products with recycled content. The desired effect of the GRS is to provide brands with a tool for more accurate labeling, to encourage innovation in the use of reclaimed materials, to establish more transparency in the supply chain, and to provide better information to consumers.
